e-conomic API functionality

version 1.4.5

The API does not currently expose every part of the e-conomic system. It supports the primary parts concerning bookkeeping and invoicing and some additional functionality.

The following table shows what entities are made available through the API and special functionality:

Entity name	Create/Delete	Read properties	Update properties	Functionality
Account	x	x	x	
Accounting years		x		
Budget figures	x	x	x	
Customer group		x	x	
Customer	x	x	x	
Customer contact	x	x	x	
Customer entries		x		Create/update via day book or invoices
Supplier group		x	x	
Supplier	x	x	x	
Supplier contact	x	x	x	
Supplier entries		x		Create/update via day book
Product group	x	x	x	
Product	x	x	x	
Order (+lines)	x	x	(x)	Register as sent, Upgrade to invoice
Current invoice (+lines)	x	x	x	Book
Invoice (+lines)		x		Get PDF, Get OIOXML
Payment terms	x	x	x	
Unit	x	x	x	
Template collection		x	x	
Employee	x	x	x	
Employee group	x	x	x	
Department	x	x	x	
Product price	x	x	x	
Currency		x		
Day book		x	x	Book
Day book entry	x	x	x	
Delivery location	x	x	x	
Distribution template		x	x	
VAT account		x	x	
Subscriber	x	x	x	

Entity name	Create/Delete	Read properties	Update properties	Functionality
Subscription (+lines)	x	x	x	
ConnectAsAdministrator		x		You can connect clients directly via the admin login
Finance entries		x		
Projects		X		
Project costs	X	X	X	Available via day book entries
Project activities		X		
Time entries	X	X	X	Approval is not yet supported
Accruals	X	X	X	Available via day book entries

Some of the functionality from add-on modules is also exposed in the API as listed:
- *Dimension:* Departments are accessible.
- *Stock Management:* Availability information for products is available.
- *Scanning:* ICashBookUtil.RegisterPdfVoucher() available for attaching scanned (PDF) document to a voucher.

Further questions about the functionality of the API are most happily answered by the API Team at: api@e-conomic.com.
